

ACKNOWLEDGEMENTS

As with any piece of research that results in the production of a thesis, on the cover there should be not only the name of the researcher, but also the name of all those unsung heroes, those who to varying degrees provided assistance, encouragement and guidance, all those people, my heroes, who have given me so much of their valuable time, love and energy. In producing this thesis, I faced my final academic challenge, to gain a Ph.D.

Now it's time to say thanks to everyone who, in one way or another, contributed to my life during my years in CUH. Some of them helped me by being my friend, and some took part in my research and, of course, all of you made it possible for me to finish my research work.

I would like to express my special appreciation and thanks to my supervisor **Dr. Manoj Kumar Gupta**, you have been a tremendous mentor for me. I would like to thank you for always encouraging and allowing me to grow as a research student. The personal and professional relationship forged in these years will stay forever. Your advice on both research as well as on my career have been invaluable. This Ph.D. thesis is the output of the effort and support of several people to whom I am extremely grateful.

Your extraordinary scientific vision and invaluable suggestions allow me to successfully accomplish my research goal. I can't thank you enough for all the care and positive attitude you had for me throughout this journey. I really think I can't express my gratitude in words but one thing I want to say is if anyone has a supervisor like you, this journey which demands a lot of patience, sacrifice and hard work can become smooth.
