

# TABLE OF CONTENTS

<i>Title</i>	<i>Page No.</i>
<b>Chapter 1: An Introduction to Low Molecular Weight (LMW) Gels and their Applications in Drug Delivery .....</b>	<b>1-64</b>
1.1. Introduction.....	1
1.2. Gels .....	3
1.2.1. Hydrogels .....	5
1.2.2. Organo/oleogels .....	7
1.2.3. Emulgels .....	9
1.2.4. Bigels or bi (phasic) gels.....	10
1.2.5. Aerogels and xerogels.....	11
1.3. Drug delivery .....	15
1.4. Drug delivery routes .....	16
1.4.1. Oral drug delivery .....	16
1.4.2. Parenteral drug delivery .....	17
1.4.3. Subcutaneous .....	18
1.4.4. Intramuscular injections.....	19
1.4.5. Intravenous administration.....	20
1.4.6. Intra-arterial .....	21
1.4.7. Transmucosal drug delivery.....	21
1.4.8. Sublingual and Buccal routes.....	22
1.4.9. Nasal drug administration .....	23
1.4.10. Colorectal drug delivery .....	25
1.4.11. Pulmonary drug delivery.....	27
1.4.12. Cardiovascular drug delivery .....	29
1.4.13. Drug delivery to the central nervous system.....	30
1.4.14. Topical and transdermal drug release .....	31
1.4.15. Topical and transdermal drug delivery: Background.....	33
1.4.16. Transdermal drug delivery route.....	34
1.5. Skin structure description .....	35
1.6. Transdermal drug delivery system: Basic principle.....	36
1.7. Topical drug carriers (LMW gels and dendrimers) .....	40

1.8.	Dendrimers.....	40
1.9.	Research gap .....	42
1.10.	2,6-DAP derivatives and its applications.....	43
1.11.	Self-assembling.....	45
1.12.	References.....	47

**Chapter 2: DAP Derived Fatty Acid Amide Organogelators as Novel Carrier for Drug Incorporation and pH-Responsive Release..... 65-121**

2.1.	Introduction.....	65
2.2.	Experimental .....	70
2.2.1.	General procedure for the syntheses of DAP derived fatty acid amide gelators .....	70
2.3.	Organogel preparation .....	73
2.4.	Bigel preparation.....	73
2.5.	Thermal stability .....	73
2.6.	Scanning electronic microscopy (SEM) .....	74
2.7.	Drug loading .....	74
2.8.	Drug release study.....	74
2.9.	Results and discussion .....	74
2.10.	Drug incorporation and pH-responsive release.....	80
2.11.	Fourier transmission infrared spectroscopy (FT-IR) analysis .....	81
2.12.	Comparative pH sensitive release: kinetics of ibuprofen drug from organogel.....	83
2.13.	Conclusion .....	86
2.14.	Experimental .....	87
2.15.	References.....	117

**Chapter 3: DAP/alginate Based Nanosilver Composite Hybrid Gel Beads for Topical Drug Delivery Applications ..... 122-168**

3.1.	Introduction.....	122
3.2.	Results and Discussion .....	129
3.3.	Fourier transmission infrared spectroscopy (FT-IR) analysis .....	142
3.4.	Conclusion .....	144
3.5.	Experimental .....	145

3.6.	Gel preparation.....	146
3.7.	AgNPs formation into gels (in situ).....	147
3.8.	Thermal stability .....	147
3.9.	Scanning electronic microscopy (SEM) .....	148
3.10.	Transmission electronic microscopy (TEM) .....	148
3.11.	Rheological studies .....	157
3.12.	Characterization of AgNPs by EDX spectrum .....	159
3.13.	References.....	161

**Chapter 4: Aminopyridinyl Tricosanamide Based Pseudoplastic and Thermoreversible Oleogels for pH-Dependant *in vitro* Release of Metronidazole..... 169-205**

4.1.	Introduction .....	169
4.2.	Characterization of oleogels .....	171
4.3.	Applications of oleogels .....	173
4.4.	Experimental .....	175
4.4.1.	Materials .....	175
4.4.2.	Preparation of oleogels .....	175
4.4.3.	Microscopic studies .....	176
4.4.4.	Fourier transform infrared spectroscopy studies.....	176
4.4.5.	Organoleptic properties.....	176
4.4.6.	Rheological studies .....	176
4.4.7.	Spreadability tests .....	176
4.4.8.	pH determination .....	177
4.4.9.	Thermal stability .....	177
4.4.10.	Drug loading .....	177
4.4.11.	Drug release study.....	178
4.5.	Results and discussion .....	178
4.6.	Conclusion .....	199
4.7.	References.....	201

**Chapter 5: Towards the Synthesis of Glycodendrimers for Drug Delivery Applications ..... 206-243**

5.1.	Introduction.....	206
5.2.	Literature survey .....	214

5.3.	Melamine as a core for synthesis of glycodendrimers.....	214
5.4.	Retrosynthetic analysis .....	216
5.4.1.	Attempt towards the synthesis of azide (1).....	217
5.5.	Conclusion .....	222
5.6.	Experimental section.....	223
5.7.	References .....	240

<b>Summary .....</b>	<b>244-251</b>
----------------------	----------------

<b>List of Publications .....</b>	<b>252</b>
