

List of Tables

Table No	Name Of The Table
Table No 3.1	showing the details of sample selected from different schools of Jammu city
Table No. 3.2	coefficients of correlation among various learning styles as measured by the learning style inventory
Table No.4.1	Modal summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school students.
Table No.4.2	Annova summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school students.
Table No.4.3	Coefficients summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school students.
Table No.4.4	Model summary of hypothesis of impact of learning style on the academic achievement of secondary school students with reference to enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
Table No.4.5	Annova summary of hypothesis there will be no significant impact of learning style on the academic achievement of secondary school students with reference to enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
Table: 4.6	Coefficients summary of hypothesis there will be no significant impact of learning style on the academic achievement of secondary school students with reference to enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
Table: 4.7	Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
Table: 4.8	Annova summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school Students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
Table No.4.9	Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.

- Table No 4.10 Model summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school male students
- Table No 4.11 Annova summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school male students
- Table No 4.12 Coefficients summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school male students
- Table No.4.13 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.14 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.15 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.16 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.17 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
- Table No.4.18 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school male students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
- Table No.4.19 Model Summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school female students

List of Tables Continued...

- Table No.4.20 ANNOVA Summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school female student
- Table No.4.21 Coefficients Summary of hypothesis there will be no significant impact of learning style on the academic achievement of the secondary school female students
- Table No.4.22 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.23 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles
- Table No.4.24 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles
- Table No.4.25 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.26 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.27 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the secondary school female students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.28 Model summary of hypothesis there will be no significant impact of learning style on the academic achievement of the rural secondary school students
- Table No.4.29 ANNOVA summary of hypothesis there will be no significant impact of learning style on the academic achievement of the rural secondary school students

List of Tables Continued...

- Table No.4.30 Coefficients summary of hypothesis there will be no significant impact of learning style on the academic achievement of the rural secondary school students
- Table No.4.31 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.32 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles
- Table No.4.33 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles
- Table No.4.34 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
- Table No.4.35 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
- Table No.4.36 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the rural secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles
- TableNo.4.37 Model summary of hypothesis there will be no significant impact of learning style on the academic achievement of the urban secondary school students
- Table No. 4.3 ANNOVA summary of hypothesis there will be no significant impact of learning style on the academic achievement of the urban secondary school students
- Table No.4.39 Coefficients summary of hypothesis there will be no significant impact of learning style on the academic achievement of the urban secondary school students

List of Tables Continued...

- Table No.4.40 Model Summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.41 ANNOVA Summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.42 Coefficients Summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive reproducing, enactive constructive, figural reproducing, figural constructive, verbal reproducing and verbal constructive learning styles.
- Table No.4.43 Model summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.44 ANNOVA summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
- Table No.4.45 Coefficients summary of hypothesis there will no significant impact of learning style on the academic achievement of the urban secondary school students with reference to their enactive, figural, verbal, reproducing and constructive learning styles.
