

LIST OF TABLES

3.1 Design of the Study	76
3.2 Detail of the Samples	77
3.3 Grouping of the Samples	77
4.1 Significance of Mean Difference between experimental Group and control group on motor Functioning in Pre-test Phase	94
4.2 Significance of Mean Difference between experimental Group and control group on academic level in Pre-test Phase	95
4.3 Significance of Mean Difference between experimental Group and control group on communication in Pre-test Phase	95
4.4 Significance of Mean Difference between experimental Group and control group on motor functioning in Post-test Phase	97
4.5 Significance of Mean Difference between experimental Group and control group on academic level in Post-test Phase	98
4.6 Significance of Mean Difference between experimental Group and control group on communication level in Post-test Phase	99
4.7 Significance of Mean Difference between experimental Group and control group on motor functioning in Post-test II Phase	101
4.8 Significance of Mean Difference between experimental Group and control group on academic level in Post-test II Phase	102
4.9 Significance of Mean Difference between experimental Group and control group on communication level in Post-test II Phase	102
