Chapter I	1-30
Part A: Introduction and development of benzannulation chemistry	1-15
1.1. Introduction to benzannulation reactions	1
1.2. Various types of benzannulation reactions	2
1.2.1. Transition metal-mediated benzannulation reactions	2
1.2.2. Electrocyclic benzannulation reaction	7
1.2.3. Dies-Alder type benzannulation reactions	9
1.2.4. [3+3] benzannulation reactions	12
1.3. Conclusion	15
Part B: Introduction and synthetic applications of allenyl sulfones	16-30
1.4. Allenyl sulfones-an introduction	16
1.5. Reactions of allenyl sulfones	17
1.5.1. Conjugate addition reactions	17
1.5.2. Cycloaddition reactions	19
1.5.3. Sulfinato-triggered reactions	21
1.5.4. Miscellaneous reactions	23
1.6. Conclusion	26
1.7. References	27
Chapter II: Base-mediated [3+3] benzannulation reactions of bis-sulfonyl propenes and Morita-Baylis-Hillman (MBH) bromides for the synthesis of highly substituted arenes	31-96
2.1. Introduction	31
2.2. Aryl sulfones	33

2.3.	Synthesis of aryl sulfones	34
2.3.1.	Oxidation of aryl sulfides	34
2.3.2.	Sulfonylation of arenes by sulfonyl chlorides	35
2.3.3.	Coupling of sulfinates with aryl halides	35
2.4.	Synthesis of aryl sulfones via benzannulation reactions	36
2.5.	Statement of the problem	37
2.6.	Results and discussion	39
2.7.	Plausible mechanism for benzannulation reaction	43
2.8.	Synthetic modification of biarylmethane derivatives	44
2.9.	Conclusion	44
2.10.	Experimental section	45
2.11.	References	66
2.12.	NMR spectra of new compounds	69

Chapter III: Regioselective and oxidative [3+3] benzannulation reactions for the synthesis of highly substituted benzophenone derivatives **97-178**

3.1.	Introduction	97
3.2.	Methods for the synthesis of benzophenone derivatives	99
3.2.1.	Oxidation of biarylmethanes	99
3.2.2.	Transition metal-catalyzed coupling reactions	100
3.2.3.	Direct addition of Grignard reagents to acid chlorides	100
3.2.4.	Benzannulation-based methods for synthesis of benzophenone derivative	101
3.3.	Background to the present work	102
3.4.	Results and discussion	104
3.5.	Plausible mechanism of the benzannulation reaction	110
3.6.	Conclusion	111
3.7.	Experimental section	111
3.8.	References	138
3.9.	NMR spectra of new compounds	140

Chapter IV: Facile synthesis of sulfone-bearing indoles and related heterocycles via a sequential formal vinylic substitution and intramolecular Heck coupling reaction	179-271
4.1. Introduction	179
4.2. Synthesis of indoles from o-haloanilino enamines	180
4.3. Background to the present work	183
4.4. Results and discussion	187
4.5. Conclusion	198
4.6. Experimental section	199
4.7. References	227
4.8. NMR spectra of new compounds	229
Summary	272-279
