

ACKNOWLEDGEMENT

The present research work is the brain child of Prof. (Dr.) Sarika Sharma, School of Education, Central University of Haryana. Since its inception, the technology enabled education was found to be a thrust area and it was handled in a justified manner under her supervision. This new area of research required a lot of brainstorming and thinking out of the box. She gave me a free hand to explore new horizons and use my potential to the fullest. I found her a guiding light in all the phases while carrying out, the present study. Her inspiration and timely intervention helped me in shaping my work in the right direction. She has been kind enough to provide me all the facilities and support to me as and when required. Every discussion with her reflected her wisdom. This helped me to frame my ideas in an organized manner. Her humbleness and understanding nature impressed me a lot. She guided me to incorporate authentic aspects to make this study an original one. Whenever I needed her, she very cordially made herself available despite her busy assignments. Last but not the least, it was enlightening to work under her supervision.
