Abstract	ix
List of Research Papers	xiii
List of Figures	xvii
List of Tables	xix
1 Preliminaries and Basic Concepts	1
1.1 Order Statistics	1
1.2 Distribution of Order Statistics	2
1.3 Moments and Recurrence Relations	5
1.4 BLUEs of the Location and Scale Parameters	7
1.5 Method of Maximum Likelihood Estimation	9
1.6 Method of Moments	10
1.7 Methods of Generating Distribution	10
1.8 Some Continuous Distributions	14
2 Inferences for Type-II Exponentiated Log-logistic Distribution based on Order Statistics with Application	21
2.1 Introduction	21
2.2 Relations for Single Moments of Order Statistics	23
2.3 Relations for Product Moments of Order Statistics	26
2.4 BLUEs of the Location and Scale Parameters	28
2.5 Approximate Inference	29
2.6 Real Data Application	40
2.7 Conclusion	41
3 Estimation of the Parameter for Modified Power Function Distribution based on Order Statistics with Application	43
3.1 Introduction	43
3.2 Relations for Single Moments of Order Statistics	46
3.3 Relations for Product Moments of Order Statistics	47
3.4 BLUEs of the Location and Scale Parameters	48

3.5	Numerical Results	50
3.6	Real Data Application	51
3.7	Conclusion	51
4	Inference for the Extended Power Lindley Distribution based on Order Statistics with Application	61
4.1	Introduction	61
4.2	Technical Lemmas	62
4.3	Relations for Single Moments of Order Statistics	65
4.4	Relations for Product Moments of Order Statistics	68
4.5	BLUEs of the Location and Scale Parameters	75
4.6	Real Data Application	75
4.7	Conclusion	79
5	Inferences for Generalized Topp-Leone Distribution under Order Statistics with Application to Polyester Fibers Data	81
5.1	Introduction	81
5.2	Relations for Single Moments of Order Statistics	82
5.3	Application to the Lifetime of Coherent Systems	88
5.4	Relations for Product Moments of Order Statistics	91
5.5	BLUEs of the Location and Scale Parameters	99
5.6	Real Data Application	99
5.7	Conclusion	102
6	Weibull Marshall-Olkin Lomax Distribution with Applications to Bladder and Head Cancer Data	103
6.1	Introduction	103
6.2	Proposed Model	105
6.3	Linear Representation	107
6.4	Properties of the WMOL Distribution	110
6.4.1	Quantiles Function	111
6.4.2	Moments and Generating Functions	111
6.4.3	Conditional Moments, Mean Residual Life and Mean Deviations	112
6.4.4	Bonferroni and Lorenz Curves	113
6.4.5	Residuals Life Function	114
6.5	Maximum Likelihood Estimation	117
6.6	Simulation Study	118
6.7	Real Data Application	119
6.8	Conclusion	123
