

LIST OF TABLES

<i>Table No.</i>	<i>Name of Table</i>	<i>Page No.</i>
3.1	Proportion of area under each crop to total cropped area in Punjab (000' ha)	41
3.2	Exponential growth and acceleration or deceleration	42
3.3	Crop diversification measures in Punjab	43
3.4	Inter-temporal movement of RCt and RCat of area, production, and productivity of crops	45
3.5	Area, yield and interaction effect of the crops	47
3.6	Sources of agricultural growth in Punjab	48
3.7	Estimated regression coefficients of Equation (3.8)	49
4.1	Summary statistics of the monsoon onset day	59
4.2	Estimates for change in onset and probability of delayed monsoon across districts	60
4.3	Impact of monsoon onset day and crop productivity	65
4.4	Robustness check with additional control variables of Equation (4.3)	66
4.5	Estimated regression coefficient of Equation (4.4)	67
4.6	Robustness check with additional control variables of Equation (4.4)	68
5.1	Summary statistics	80
5.2	Estimated efficiency scores of wheat across tehsil from Equation (5.1)	82
5.3	Estimated efficiency scores of paddy across tehsil from Equation (5.1)	83
5.4	Peer-weights for inefficient tehsil and peer counts (Wheat)	86
5.5	Peer-weights for inefficient tehsil and peer counts (Paddy)	87
5.6	Classification of inefficient tehsils (Wheat)	88
5.7	Classification of inefficient tehsils (Paddy)	88
5.8	Actual and target values of input and output variables and potential reduction in inputs and potential addition in outputs (Wheat)	91
5.9	Actual and target values of input and output variables and potential reduction in inputs and potential addition in outputs (Paddy)	92
5.10	Estimated results from Equation (5.4) and Equation (5.5) for both crops	94
5.11	Estimation of equation (5.6)	95
